CAREER EXPERIENCE

X Corp (Twitter / X / xAI / Grok) Jul 2022 – Apr 2026

Global Senior Business Systems Manager — GTM Sales, PRM & Service Cloud

San Francisco, CA | Individual Contributor

- **BizOps Product Delivery:** Drove end-to-end feature delivery across a cross-functional team of Business Analysts, Platform Admins, and Integration Engineers — owning backlog prioritization, translating stakeholder requirements into scoped deliverables, and managing release sequencing to ship platform enhancements on schedule with full business sign-off.
- **Incident Management & Escalation:** Owned end-to-end incident response for Salesforce and integrated commercial platforms across 30+ applications — served as escalation lead for high-impact production issues, coordinating resolution across Engineering, IT, and business stakeholders, and ensuring service restoration within defined SLAs.
- **UAT Leadership & Release Validation:** Designed and executed UAT frameworks for Salesforce Sales Cloud, Marketing Cloud, and Partner Community releases — authored test scripts, led defect tracking cycles, and secured business sign-off from senior stakeholders across Sales, Finance, and Operations prior to production deployment.
- **Platform Troubleshooting & CRM Architecture:** Troubleshot and resolved complex issues across Salesforce, CPQ workflows, O2C integrations, and downstream ERP processes — collaborating with architects and developers to maintain clean, scalable data models and system architecture aligned to commercial operations.
- **Process Improvement & Documentation:** Identified and implemented process improvements that increased delivery efficiency and release quality across the business applications portfolio; maintained SOPs, knowledge base articles, and operational runbooks to support consistent team delivery at scale.
- **Out-Of-Box CRM/GTM System Features Delivery and AI-Powered Workflow Automation:** Planned, Built (hands-on) and scaled OOB System Admin tasks in installation, maintenance, configuration, debug, configuration and AI-augmented enterprise infrastructure and automated core workflows with MCP servers, API development, and enterprise integrations.

Rubrik Mar 2022 – Jul 2022

IT Product Manager, Enterprise Applications — Global GTM / PRM

Palo Alto, CA | Individual Contributor

- **Enterprise Application Delivery:** Made feature delivery, incident resolution, and platform enhancements for Salesforce and partner portal systems against a strategic GTM application roadmap by driving strategies into clear milestones, goals, and dependencies while keeping stakeholders informed and designed pilots and experiments, success measures, and scale wins quickly.
- **Platform Stability & Adoption:** Ensured data quality, system usability, and adoption across Salesforce.com and PRM systems through close collaboration with Sales and Revenue leadership — establishing configuration governance standards and CRM hygiene practices.
- **Structured Release Cycles:** Led the rebranding and redesign of the partner portal community system, delivering ongoing feature enhancements through structured release cycles with stakeholder-validated UAT and defect-to-resolution tracking.

Quantcast Oct 2019 – Mar 2022

Enterprise Applications Product Owner — Salesforce & Integrated Applications

San Francisco, CA | Individual Contributor

- **Salesforce Platform Ownership:** Owned org-wide Salesforce Sales Cloud, CPQ, Service Cloud, and Community — led a Scrum team on large strategic initiatives from problem framing through system delivery, UAT, and change management across global geographies and functions.
- **Multi-System Integration & Release Operations:** Architected and maintained integrations across Salesforce, SalesLoft, ZoomInfo, Marketo, Zendesk, JIRA, and Smartsheet — coordinating cross-team release cycles, defect tracking, and production support to ensure continuity across the commercial tech stack in a regulated enterprise environment.
- **Incident Resolution & Delivery Cadence:** Managed a standard cadence of system changes across Sales, FP&A, Legal, HR, and Customer Services; coordinated requirement gathering, quality testing, and deployment — resolving production issues within SLA and maintaining operational predictability for business-critical workflows.
- **SOX & Compliance Governance:** Supported internal and external SOX ITGC and SOD compliance audits — ensuring system access controls, change documentation, and audit trails met enterprise governance standards.

Salesforce.com (via Global Infotech Consulting — CIO Org, Sales Operations Domains) Feb 2019 – Oct 2019

Sr. Business Systems Analyst

San Francisco, CA (Salesforce HQ)

- Led planning, design, and delivery of cross-functional CRM enhancement projects at Salesforce HQ; partnered with stakeholders to shape requirements and align business strategy with system architecture — maintaining upstream/downstream integration knowledge across the enterprise application landscape.
- Coordinated and performed system testing; worked closely with project teams during UAT, tracking defects through resolution and securing end-user acceptance — ensuring CRM enhancements met defined requirements before production release.
- Identified process improvement opportunities via data governance analysis; surfaced recommendations on integration and functionality intersection points to reduce operational risk.

Salesforce.com (via Talentburst Consulting — Revenue Org.) Nov 2016 – Oct 2017

Partnership Sales Operations Analyst

San Francisco, CA (Salesforce HQ)

- Managed Salesforce CPQ and partner systems supporting global license delivery, account reconciliation, and SKU management — maintaining 100% SLA performance across commercial operations workflows.
- Led Partner Order Management Channel 2.0 system planning and implementation; conducted SFDC Analytics, Data Loader, Workbench, and SOQL-based analysis to define system solutions that increased operational efficiency by 50%+.
- Drove Quote-to-Cash process improvements spanning territory management, deal approvals, and commission planning; built dashboards to track business metrics and surface actionable insights for leadership decision-making.

Google Inc. (via Crowdstaffing — Google Cloud) Feb 2018 – Sep 2018

Sr. Partner Incentive Business Operations Analyst

Sunnyvale, CA

- Launched and managed five annual pre-sales incentive partnership programs end-to-end; maintained comprehensive program documentation and managed complex escalations through the full delivery lifecycle.
- Developed and automated operational reports and dashboards using SQL, Python, BI tools, and Salesforce Analytics — driving data-informed decisions and identifying operational efficiencies in partnership with Finance.
- Leveraged analytical insights to drive organizational decision-making and strategy, identify opportunities for operational efficiencies, and develop program roadmaps to implement processes at scale. Provided real-time support and training for external and internal partners, managed complex escalations, and maintained comprehensive project documentation.

Google Inc. (via Artech — Google Ads) Dec 2015 – Oct 2016

Sales Operations Analyst Team Lead

Mountain View, CA

- Defined scope, business-function requirements, and system specifications for complex operational projects — participated in UAT testing for new automation tools with cross-functional teams and produced 30+ weekly reports measuring performance across global markets.
- Produced 30+ weekly reports analyzing qualitative and quantitative insights to improve business performance, growth, product adoption, and productivity across global markets. Defined scope, business-function requirements, and Business-Systems specifications for complex projects and participated in UAT testing for new automation tools and processes with cross-functional teams.
- Established alternative problem-solving methods and forecasted yearly headcount for strategic business perspectives. Incorporated best practices and global programs into business/product plans and scalable practices.

iHerb.com (Global E-Commerce) Apr 2013 – Sep 2015

Global Logistics Operations Specialist

Moreno Valley, CA

- Coordinated global shipping logistics, managing schedules, data, and contracts with freight forwarders, airlines, vendors, and partners. Oversaw warehouse operations, including SKU and pricing setups, badge and manifest tracking, and trucking payments. Managed customer feedback data in Salesforce, Zendesk, and Excel. Tracked social media metrics to demonstrate the effectiveness of marketing campaigns. Successfully implemented a CRM system to manage vendor and partner relationships and resolved cost allocation issues and invoices.
